Trendway's list of products with environmental attributes continues to grow.

**TRENDWAY RECEIVES INDOOR AIR QUALITY CERTIFICATION
FOR ITS CHOICES® PANEL SYSTEM**

HOLLAND, MI . . . Trendway Corporation announced today that its popular Choices® panel system has achieved SCS (Scientific Certification Systems) Indoor Advantage™ certification for indoor air quality.

“This certification of our Choices product's environmental attributes is significant for Trendway because it's the first of several we hope to obtain in the future,” noted Jim Dowling, Trendway environmental compliance administrator. “What is especially satisfying is that we didn't need to change anything about the product – these environmental qualities have been part of the product and our manufacturing right from the beginning. Now we're eager to have our other products evaluated.”

The certification demonstrates conformance with the emissions standards of both USGBC LEED-CI Credit EQ4.5 Option B (systems furniture and seating) and BIFMA X 7.1 low-emitting office furniture and seating. SCS Indoor Advantage certification is administered by the independent third-party certifier SCS (Scientific Certification Systems) of Emeryville, California. The certification relies on data collected through small chamber testing, which allows manufacturers to examine a product's individual components to aid in further product development.

According to Trendway President Bill Bundy, “Environmental initiatives and commitment are not new for Trendway. Our company's employees participate in our programs daily. Earning the SCS Indoor Advantage certification affirms that our products are earth friendly -- people friendly too.”

About Trendway

Trendway Corporation, an employee-owned company, manufactures systems and freestanding office environments and seating, which are distributed throughout North America. It's ISO 9001:2000 certified

About Scientific Certification Systems (SCS)

SCS is an independent certifier of environmental and sustainability claims. Over two decades, SCS has developed internationally recognized standards and certification programs aimed at spurring the highest level of environmental improvements, social accountability and product performance. SCS was the first company to offer manufacturers a program for verifying the accuracy of environmental claims on products. Certification programs for building products include Indoor Advantage[™], Indoor Advantage[™] Gold, Environmentally Preferable Product, Recycled Content, SCS Sustainable Choice[™], FloorScore[™], and Biodegradability. For more information about SCS, visit www.scs-certified.com or call 510-452-8000.
